## Endoscopic plastic surgery

Any procedure that requires an incision can leave a scar. Instead of the usual ear-to-ear incision, three or more puncture-type incisions are made just at the hairline.

## Endoscopic Plastic Surgery in Jacksonville at First Coast Plastic Surgery

Patients with loose facial or abdominal skin may benefit from a combination of classic and endoscopic techniques, in face or forehead lift, or abdominoplasty. However, in the world of plastic surgery, endoscopic instruments have recently been introduced. General anesthesia is used for the procedure, so you'll be unconscious.

that if a complication occurs at any time during the operation Board certified plastic surgeon Dr. And the procedure is minimally invasive, reducing the risk of operative complications and allowing quick return to daily activities.

small incision in the underarm or the navel, an endoscope can assist the surgeon in positioning breast implants within the chest wall. If the muscles and skin of the mid-face need to be smoothed and tightened, incisions may be hidden in the lower eyelid and in the upper gumline. Endoscopic surgery has been used for decades in a number of different procedures, including gallbladder removal, tubal ligation, and knee surgery.

### **Endoscopic Plastic Surgery**

In a typical endoscopic procedure, only a few small incisions, each less than one inch long, are needed to insert the endoscope probe and other instruments. Keep in mind
