Stress or metabolic response to

These metabolic changes are characteristic in patients with severe infection. Posterior pituitary The posterior pituitary produces arginine vasopressin which has a major role as an antidiuretic hormone.

## Physiologic Response to Surgery

Glucose is synthesized from alanine in a similar manner. Renin stimulates the production of angiotensin II. Response to trauma and metabolic changes: posttraumatic metabolism Turgay Şimşek 1, Hayal Uzelli Şimşek 2, Nuh Zafer Cantürk 3 1Clinic of General Surgery, Sakarya Toyotası Emergency Service Hospital, Sakarya, Turkey 2Department of Obstetrics and Gynaecology Sakarya University Training and Research Hospital, Sakarya, Turkey 3Department of General Surgery, Kocaeli University Faculty of Medicine, Kocaeli, Turkey Abstract Stress response caused by events such as surgical trauma includes endocrine, metabolic and immunological changes.

Stress Response to Surgery and Possible Ways of Its Correction in: Proceedings of the Latvian Academy of Sciences. Section B. Natural, Exact, and Applied Sciences. Volume 66 Issue 6 (2012)

Preoperative oral carbohydrate administration reduces postoperative insulin resistance.

## Metabolic Response to Illness and Operation

McKean SC, Ross JJ, Dressler DD, Brotman DJ, Ginsberg JS.

## Chapter 44. Physiologic Response to Surgery

Lidocaine blocking concentrations for B- and C-nerve fibres. Notable exceptions are the brain, spleen and the anterior part of the pituitary gland.

stress response to trauma and surgery

This fluid deficit will be exacerbated by surgical wound losses and blood loss, although it may be partially replaced by careful intraoperative management by the anesthesia team. In female subjects, oestradiol concentrations decrease for up to 5 days postoperatively.

### **Promoting Perioperative Metabolic and Nutritional Care**

Yet, optimal glucose concentrations for improving clinical outcome have yet to be established and the benefits observed with intensive insulin therapy have not been reproduced. Clin Sci 2000; 99: 321-328.
