Companies that employ materials chemists: , , , , , Wall Street, Law Firms, Venture Capital Firms Physical chemistry requires significant mathematical and statistical understanding, and that combination is valuable in many industries that have large data sets that need to be mined for information. Fundamentally, biochemical research aims to characterize the link between the structure and function of biological macromolecules. If you are a college student, or prospective student, who wants to work in a chemical research lab, then you will need to have a background in physical chemistry.

A total score greater than 8 will constitute a pass, a score equal to 8 a marginal pass, and less than 8 a fail. They use mathematical analysis and statistics on huge datasets, sometimes with millions of data points, to reveal hidden information about compounds, materials, and processes.

The Journal of Physical Chemistry A

It's very helpful for engineering students, particularly chemical engineering students. In the case of a marginal pass, these students will be allowed to take the oral exam but they will be expected to show proficiency in the subjects that were incorrectly addressed in the written portion. The practice tests are easy to navigate and are organized by topic.
