Facts about Drug Abuse Facts about Drug Abuse 7: cocaine Cocaine was the cause of 4,300 deaths in the world. It is always best to use the generic name of a drug on any prescription - whether branded or generic. For more information, see our report on.

Cocaine DrugFacts

Research shows that drug users who enter and remain in treatment reduce high-risk activities, such as sharing needles and other drug injection paraphernalia, that are responsible for spreading HCV. Surges of dopamine in the reward circuit cause the reinforcement of pleasurable but unhealthy activities, leading people to repeat the behavior again and again.

Putting drug's negative facts into every household so families and friends can read them is the most broadly effective way to slow down the druggies and their life

In fact, over the past years, the ratio of men and women drug users has slowly become more even. Street dealers often mix it with things like cornstarch, talcum powder, or flour to increase profits.
