## Grimsby Dock Tower

In most cases neither type of study provides conclusive evidence on its own, so researchers usually look at both lab-based and human studies when trying to figure out if something can cause cancer.

## Bull Dog 1,000W Metal Halide Light

### Tower

Residential exposure to extremely low-frequency magnetic fields and risk of childhood leukaemia, CNS tumour and lymphoma in Denmark. How much electromagnetic radiation you are exposed to depends on the strength of the electromagnetic field, your distance from the source of the field, and the length of time you are exposed.

### Item# BD

The water was obtained from a well, 15 ft 4. Generating, transmitting, distributing, and using electricity all expose people to ELF radiation. Instead, studies try to compare people exposed at higher levels with people exposed at lower levels.

### Bulldog

Still, when the findings from these studies are combined, a small increase in risk is seen for children at the highest exposure levels compared to those with the lowest exposure levels.

### Grimsby Dock Tower

One of its major goals is to identify causes of cancer. Sturdy frames made with metals, like powder-coat steel, provide a strong support for you and your weight training accessories.
