The end of the Bronze Age : changes in warfare and the catastrophe ca. 1200 B.C. (Book, 1993) [me.stfw.info.cdn.cloudflare.net]

A few hundred years later, the Minoan civilization emerged on the island of Crete. Several factors probably played a part, including climatic changes such as those caused by volcanic eruptions , invasions by groups such as the , the effects of the spread of iron-based , developments in military weapons and tactics, and a variety of failures of political, social and economic systems.

The Fall of a Civilization: The Mysterious Collapse of the Mycenaean Bronze Age

The rate of pollen production is an important factor in palynology. Other cities, such as , continued to be occupied, but with a more local sphere of influence, limited evidence of trade and an impoverished culture, from which it took centuries to recover.

THE END OF THE BRONZE AGE

Nor is it just the evolution of weaponry that changes warfare.

Late Bronze Age collapse

Consider a simple thought experiment.

The Coming of the Greeks: Indo

The iron plough changed agriculture, for ever — it made tough soils arable in a way that no one had imagined before. Scholars believe a combination of natural catastrophes may have brought down several Bronze Age empires. Gone were monumental architecture, writing systems, pottery types and familiar settlement patterns.
