Aggregate resources, land use and policy on the lower mainland of British Columbia

Mineral mining plans shall be attached to the application and consist of the following: 1. Permit Transfer Acceptance, DMM-161 rev.

Aggregate resources, land use and policy on the lower mainland of British Columbia

A notice that informs property owners that they have 10 days from receipt of the permit notification to specify written objections or request a hearing. Two copies Copies of the application shall be submitted to the division in a manner acceptable to the director. Separate boundary markings are not required if clear, readily identifiable features, such as streams, permanent roads, or permanent power lines coincide with the permit boundary.

Vol. 30 Iss. 6 (Final Regulation) 4VAC25

In 2020, we continued essential partnerships with environmental organizations and non-governmental organizations NGOs in the U. The permit renewal and maps must be received by the anniversary date and meet the requirements in through. A 100-year, 24-hour storm occurs when the total 100-year storm rainfall occurs in a 24-hour period.

FORMS (4VAC25)

The method of operation shall provide for the conducting of reclamation simultaneously where practicable with the mining operation. Sensitive features within 1,000 500 feet of the permit boundary such as including state waters, cemeteries, oil and gas wells, underground mine workings, streams, creeks and other bodies of public water, public utilities and utility lines, public buildings, public roads, schools, churches, and occupied dwellings shall be shown. Impoundments shall be closed and abandoned in a manner that ensures continued stability and compatibility with the post-mining land use.
