Endovascular Aneurysm Repair (EVAR)

European Journal of Vascular and Endovascular Surgery. The goal of aortic aneurysm treatment is to reduce the risk of complications from aneurysms as the major risk for untreated aneurysms is rupture. Our division remains at the forefront of virtually every aspect of vascular disease treatment, focusing on advanced ways to use methods whenever possible through clinical trials and studies.

Vascular and Endovascular Surgery

You may need to stay at the hospital for a day or more, depending on your condition.

Endovascular Surgery

Patients who have undergone EVAR typically spend one night in the hospital to be monitored, although it has been suggested that EVAR can be performed as a same-day procedure. An endovascular stent graft is a fabric tube supported by metal wire stents also called a scaffold that reinforces the weak spot in the aorta.

Vascular and Endovascular Surgery

Drivers Medical Group, DVLA, Swansea. Your neurosurgeon will be able to help you decide which approach is best for you.
