Eleftheriou A, Holme NA: Macrofauna techniques. Diversity of the benthic invertebrates was determined using Shannon Wiener Index, Equitability E of species Sikoki, F. The conditions when this material is deposited are usually slow-moving water, intrusion when a higher part of the bed is encountered, or deposition in bars and on floodplains.

BS EN ISO 8689

The state and seasonal variability of some physicochemical parameters in the New Calabar River, Nigeria.

The distribution and diversity of benthic macroinvertebrate fauna in Pondicherry mangroves, India

River Research and Applications 18: 569-581. The Effects of Fine Sediment on Aquatic Habitat: A Comprehensive Bibliography Adams, J.

BS EN 27828:1994, ISO 7828

An awareness of the larger time frame helps to put these variables in their proper perspective. Subsequent studies were modeled after this laboratory experiment with very similar results. This is especially true for research in the Western United States.
