New from ACRL

While by no means comprehensive, the purpose of this article is to provide an overview of classical organizational theory for academic librarians to inform the discussions of change. As an example, work side-by-side with faculty and graduate teaching assistants to develop course materials, shape overall student engagement, and provide individual and group academic support.

Interview with Steven Bell

The book is designed to help readers find direction and purpose in working practice. When it comes to financial decisions regarding personnel, however, only about half make decisions independently or independently in consultation with these groups 56 percent combined. He is currently combining his consulting work with teaching professional communication in the Manning School of Management at University of Massachusetts—Lowell.
