## Romania country profile

This page provides the data for your chosen country across all of the key metrics on this topic.

## Romania country profile

You can read our explainer on the different metrics used to measure energy.

## Romania Overview

In the energy domain, there are many different units thrown around — joules, exajoules, million tonnes of oil equivalents, barrel equivalents, British thermal units, terawatt-hours, to name a few. We look at electricity consumption later in this profile. The NSDS proposes to establish a Coalition for Sustainable Development, which would act as an NGO and advocate for the SDGs Ministry of Environment, 2018.

## Country Profile

It effectively measures how efficiently a country uses energy to produce a given amount of economic output. If available, attach a diagram organization chart showing national coordination structure and linkages between ministries: Break in the time series.

## Romania: Energy Country Profile

However, where Governments have not provided information for the tables appended to Chapters 4 and 17, those tables have been omitted entirely in order to reduce the overall length of the profile and save paper. Romania: Per capita: how much electricity does the average person consume? But the burning of fossil fuels — coal, oil, and gas — is responsible for global greenhouse gas emissions.

## Romania country profile

Former communists dominated politics until 1996 when a centrist government came to power. Romania, as the largest country in the Danube basin, also contributes to developing and updating the Danube River Basin Management Plan.

### **Top stats for Romania: Country profile**

Romania: Carbon intensity: how much carbon does it emit per unit of energy? Official name: Romania Area km<sup>2</sup> : 237 500 Population: 21.
