### How to Build a Water Garden

Dig a couple of inches wider than the actual shape of your pond and 3 inches deeper than the liner. Before building your water garden, do a little homework to decide what size and design is best for you.

Fish also require plenty of oxygen. Submerged plants also provide a spawning area and hiding place for fish and other water creatures. Netting is effective, especially over small ponds and containers.

### How To Make A Simple Water Garden

But this would be time consuming every month? Warm water contains less oxygen than cool water, so a 30-gallon tub on a sunny patio can hold fewer fish per gallon than an in-ground pond. Change the water every month with more distilled water or tap water that has been left out for a good 24 hours first. Errors will be corrected where discovered, and Lowe's reserves the right to revoke any stated offer and to correct any errors, inaccuracies or omissions including after an order has been submitted.

### How to Make a Water Garden: 12 Steps (with Pictures)

Unlike regular gardening, where you can blunder your way through almost any experiment and start fresh the following year, a pond often involves a greater investment of time and money.
