### **Education Crisis: India is in the middle of an engineering education crisis**

Assessment process needs to be made more scientific to encourage multiple skills of the students.

### **Crisis in the Present Education System in India**

By adding newer disciplines of study, by linking the new experimentation with the existing curriculum, and by providing incentives and rewards to teachers and students, the formal system has sought to strengthen itself. Creativity is one of the most important human resources which enable us to look past what exists and discover new ways of thinking. The distinction between the Central and State Universities is one of difference in the source of funding.

### **The creativity crisis in the Indian education system**

Smartphone shipments in India grew 11 percent on a year-over-year basis in the first quarter of 2021, as per a report by Canalys.

### **A step towards solving India's learning crisis**

Either way, rote learning has been the staple of the Indian education system for many years. Thereafter, it was drastically reduced and it stood at 8% in the Eighth Plan 1992-97 which is one-half of that of the Seventh and less than one-third of Fourth Plan as shown in Table 17.

### **Crisis in Higher Education in India**

A survey of 200 Indian and foreign companies found that only 14% of Indian graduates were prepared for the workforce, largely because most graduates were unable to apply their knowledge to solve real-world problems. Many teachers are unqualified when it comes to using new technologies and interfaces.

### **Crisis in the Present Education System in India**

This also helps them little in their real-life situations. Also the fact that according to the UNCTAD study on the 1971 base line India exported 900

crores worth trained manpower goes to prove that the product of higher education is irrelevant for the country itself but serves the cause of other countries.

### **Crisis in Higher Education in India**

According to a nationwide survey by EZVidya, 80% of principals believe that the emphasis on rote learning is leading to the poor quality of our education system.

### **A step towards solving India's learning crisis**

This has resulted into a vast number of students being completely disconnected from schools. The list can be lengthened with telling effect. For creativity, you need to create an environment for curiosity and a way to encourage students and get the best out of them
