Before the development of mass political parties, elections typically featured a much lower level of competitiveness, had small enough that was feasible, and held elections that were dominated by individual networks or cliques that could independently propel a candidate to victory in an election. This is the case in countries that are ruled by Army Juntas and Cabals whose primary role is to take over the democratic structures and impose dictatorship.

The Political System

A common argument for public funding of political parties is that it creates fairer and more democratic elections by enabling more groups to compete, whereas many advocates for private funding of parties argue that donations to parties are a form of political expression that should be protected in a democracy.

CONTEMPORARY POLITICAL SYSTEMS

The political system is one of the pillars of modern democracies and without it, there can be no mechanism through decisions affecting the lives of the citizenry can be taken. Athenian democracy also had similar body of government which includes the Assembly, the Council and the Courts. Selection by a smaller group can be a feature of party leadership transitions in more autocratic countries, where the existence of political parties may be severely constrained to only one legal political party, or only one competitive party.
