Type 4, or solid tumors with small internal cysts 9%, are also seen in the cerebellum and predominate in the spinal cord.

Tumors Arising from the Blood Vessels of the Brain: Angiomatous Malformations and Hemangioblastomas.

Serum levels of procalcitonin, a precursor of calcitonin, are raised in bacterial meningitis due to leakage through the impaired blood-brain barrier, whereas they are normal in viral infections and other types of meningitis such as aseptic meningitis 39.

Drug

Their misinterpretation as such may result in needless and extensive clinical evaluations that are intended to detect a presumed malignancy at another site. Epidural injections of steroids are considered safer, but cases of aseptic meningitis have been reported following this procedure as well.
