## Non

The study investigated how Putonghua-Cantonese bilingual children differ from monolinguals in their acquisition of speech sound and phonological patterns.

## Refubium

Unweighted kappa statistics were used to measure the agreement among raters, and the inter-rater agreements for PC-NIHSS and CC-NIHSS videos were compared with those of original English language NIHSS E-NIHSS videos. Chinese writing is one of the only contemporary writing systems that still prominently bears traces of its pictographic origins.

## Refubium

The course will utilize the task bank of advanced and superior levels of the Computerized Oral Proficiency Assessment COPA developed by CLC in 2000 which provides virtual simulation context to students. The bilingual children demonstrated smaller sound inventory in both languages and more delayed and atypical phonological processes.

During the colonial period, English, which refers to the high variety, has been widely used in the Government and by the legal, professional and business sectors, while Cantonese, which refers to the low variety, has been mainly used in social communication as the colloquial dialect.

## Non

Add to that the secondary students protesting against the switch to Putonghua in classes normally conducted in Cantonese and the 120,000 strong crowd surrounding the government headquarters to protest against national education in 2012.
