### SAS Documentation Example Code and Data

Here is how to get an idea of different styles look and feel.

### SAS Enterprise Guide

For instance, students who write often target the academe and its members.

### Computing Descriptive Statistics for Specific Groups

Save record identifiers with the results. To change your report style, just click on Properties of the workspace toolbar: This will open the Properties for SAS Report window where you can select any style in the Style drop-down list: After you selected desired style, click OK; this will save your change and close the window. Analyze Your Findings and Form Conclusions.

### Computing Descriptive Statistics for Specific Groups

Report Nutritional Information about Breads Available in the Region Values Per Bread Slice, Calories in kcal, Fiber in Grams The MEANS Procedure Variable. The next step is to find the information needed to create the report. These references must be compiled and arranged by following the standard APA format once you have already completed your findings.
