Drugs in sport

Testing Beta Blockers can be detected in human urine using Gas Chromatography Mass Spectrometry.

Drugs In Sports: Performance

While putting your hand up for a toilet break may not be deemed professional in modern sport, athletes use diuretics to assist with weight-loss the loss of water through urination leads to an overall loss of body weight. This can mean increased heart rate and blood flow and elevated body temperature.

Drugs and sport. Research findings and limitations

And doing so is socially acceptable. The organs and digestive system may also increase in size, which may eventually cause heart failure.
