Each chapter is authored by one of the leading contributors to the current research and development on the topic. A Vision for System Safety 2013 System Safety is the application of scientific, engineering, and management principles, criteria and techniques to optimize safety within the constraints of operational effectiveness, time and cost throughout all phases of the system life cycle. Each of these hazards requires different levels of involvement or oversight by the OEM, DAR, TAR and OAAR dependent on potential solutions, their respective military utility, and the residual

risk in the compromise that each delegate is prepared to retain.
