The Arctic tides come from the Atlantic, through the broad and deep channel between Norway and Greenland.

Andrée's Arctic balloon expedition

Indeed, we shall be mistaken if they are not far in advance of our own smug selves in culture, learning, deportment, and social refinement. Armed on the second journey with unsettling knowledge gained from interviews and research, he would have reason to believe that such seemingly unrelated events as unseasonal appearance of ice off the Labrador coast in early August; the disappearance of codfish that turned fishing villages into graveyards of rotting dories; and the unusually heavy formation of pack ice in certain harbors on the west Greenland coast might not be so unrelated after all.

On Top of the World!

An appendix lists about 150 plants collected along the coast between Coppermine River and Point Turnagain, 1838, with reference to literature by Sir W.
