Department of Audiology

Audiologists work with patients who may be frustrated or emotional because of their hearing or balance problems. Audiologists also counsel patients on other ways to cope with profound hearing loss, such as lip reading or using technology. Here is also the American Academy of Audiology Covid clinical recommendations.

Resources for Educational Audiologists

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Educational Audiology Association

If you work at a facility that is affiliated with a hospital, you should contact your hospital for information regarding your vaccination. If aided results are available that is very helpful for understanding the hearing loss with amplification. There is also a to search for wages by zip code.

Educational Audiology Association

Some school districts share educational audiology services through cooperative services.
