Important explorers of this period include , , , , , and , and. Climates like vegetation and soils change through time by natural process or by the action of humans. In 1947, the British rulers partitioned the subcontinent of India on the basis of religion.

Europe: Physical Geography

Landforms constitute basic, naturally defined regions of physical geographic concern. On a formal regional scale of size progression the Ganga-Yamuna Doab may be seen as part of the Upper Gangetic Plain, which in turn is a portion of the Sutlej-Ganga Plain. Often regional geographers have a physical or human geography specialty as well as a regional specialty.

National Geography Standard Index

Fundamentals of Physical Geography, 2nd Edition. Scientists know that the mantle is made of rock based on evidence from seismic waves, heat flow, and meteorites. In 1964, William Pattison published an article in the Journal of Geography 1964, 63: 211-216 that suggested that modern Geography was now composed of the following four academic traditions: - the investigation of the phenomena of geography from a strictly spatial perspective.

Other gazetteers may contain information about the local population, such as languages spoken, money used, or religious beliefs. So when we decide whether we would move out of our current home for a job, or to go to school, we rely on our own impression of those vernacular regions. These regions are independent of human influence and unaffected by time on the human scale.
