## **Democratizing innovation: Putting technology to work for inclusive growth**

The public sector also could play a role by improving the economics of developing broadband networks, particularly in rural areas.

## **Technologies Driving the Future of Capital Markets**

To be clear, skilled human observation, combined with machine data, still delivers the most robust and impactful understanding of manufacturing processes or retail operations.

### **DLT in the Capital Markets**

This segment of the supply chain often has high fixed costs and manufacturers must constantly improve facilities to keep up with rapid tech innovation.

### **DLT in the Capital Markets**

Shorter settlement times and more efficient use of collateral could also reduce capital costs, especially on the sell side. Economic growth, with its main engine slowing, has trended lower. Jackson International Terminal F, direct to an international destination, can check in at kiosks, drop baggage at lobby counters, pass through security checkpoints, and board their flight using facial recognition technology.
