Herrick, James William 1977 Iroquois Medical Botany.

Review on Cardamine diphylla (Michx.) A. wood (Brassicaceae): Ethnobotany and glucosinolate chemistry

These factors must be taken into account in the consideration of the hypothesis that the Algonquin of the lower Ottawa River area were subarctic in their aboriginal. Conservation and management of traditional medicinal plants is an important issue worldwide, mostly in developing countries where medicinal plants are primary forest products for rural communities.

Traditional use of medicinal plants in the boreal forest of Canada: review and perspectives

¹ Ecology is the science which deals with the relationships between species of living things and between species and the non-living components of their environment. Contents include: preparing yourself, planning strategies for students, resources, graphic organizers.
