Local Solutions Linking Biodiversity Education and Implementation

He explained that the Baa Atoll Biosphere Reserve, which became a UNESCO biosphere reserve in 2011, has provided a conservation case study of the benefits of conservation to share with island communities and has led to the establishment of other two UNESCO biosphere reserves in the country. It also prompted initiatives to carry out structural testing on the resistance of the traditional buildings to advance understanding of the traditional technique and its potential application elsewhere. Under Goal 4 focused on education target 4.

Coping with Environmental Challenges, Climate and Biodiversity Action in UNESCO Sites

Nearly 30 tree species in hill forest, 20 species in plain land forest and 30 species in the littoral forests used to be commercially exploited.

Women and Local Knowledge

Now, to make biodiversity sustainable is one thing; and to practice sustainable use of biodiversity is another. Direct-use value includes food, medicine, biological control, industrial materials, recreational harvesting and ecotourism.

The thematic Factsheet

This happened due to policy weakness, over-exploitation and law and order failures. To ensure progress in this area, the 1993 UN Convention on Biological Diversity has decided to launch a multi-partner International Alliance on Nature and Culture in 2020. Third layer is the canopy layer of typical Garzon population or the population with other related trees.

Coping with Environmental Challenges, Climate and Biodiversity Action in UNESCO Sites

In different countries, the habitat loss is different and causes the loss of biodiversity in different ways. During the variation of seasons the leaves fall on the ground and the fallen leaves provide enough organic deposition for the growth of both first and second layer of vegetation.

The thematic Factsheet

Persisted ecological imbalance makes the environment unfavourable for initiating any kind of development plan.

The Power of Local Action: Lessons from 10 Years of the Equator Prize

In addition, the homesteads were covered with valuable fruit, fodder, timber, fuel wood, bamboo and many multipurpose tree species.
