

Clinical aspects of inhaled particles

F. A. Davis Co. - Inhaled Aerosols: Deposition and Clearance

Description: -

- Religion - Educational Resources
- Christian Education - General
- Transplantation, Homologous.
- Lung Transplantation -- immunology.
- Lungs -- Transplantation -- Complications.
- Lungs -- Transplantation -- Immunological aspects.
- Respiratory Tract Diseases -- etiology.
- Pneumoconiosis -- etiology.
- Dust.
- Air Pollution.Clinical aspects of inhaled particles
- Clinical aspects of inhaled particles
- Notes: Includes bibliographies.
- This edition was published in 1972

Filesize: 66.81 MB

Inhaled Aerosols: Deposition and Clearance

Armée and Rouen Société de l'Histoire de Normandie, ed. General Patricio Escobar Franco and César. Office of History, and United States.

Safety of inhaled proteins for the therapeutic use

Some background is provided on mechanisms of absorption and reasons why inhalation delivery is considered for many proteins.

Clinical aspects of inhaled particles; edited by D. C. F. Muir

There has been intense research into the role nitric oxide NO plays in physiological and pathological mechanisms and its clinical significance in respiratory medicine. May be very minimal identifying marks on the inside cover. Exhaled and nasal NO are diagnostically low in cystic fibrosis and primary pulmonary dyskinesia.

However, changes of the mode of inhalation and physical properties of the aerosol can result in differing deposition patterns of these particles within the lungs. Clinical aspects of inhaled particles; edited by D.

Clinical aspects of exhaled nitric oxide

The majority of pages are undamaged with minimal creasing or tearing, minimal pencil underlining of text, no highlighting of text, no writing in margins. Elevated levels of exhaled levels of exhaled NO in asthma and other inflammatory lung diseases lead to many studies examining NO as potential markers of airway inflammation, enabling repeated noninvasive and standardized monitoring of airway inflammation.

Safety of inhaled proteins for the therapeutic use

Weems and Miriam Allen De Ford, contrib.
