### What is the difference between a hurricane watch and a warning?

In the past week, we've seen tropical storms Josephine and Kyle form in the Atlantic. Showers and thunderstorms associated with a broad area of low pressure located about a hundred miles west of the southwesternmost Cabo Verde Islands have diminished since yesterday.

### National Hurricane Center

Scattered moderate isolated strong convection is noted from 07N to 12N between 46W and 50W. Hurricane warnings indicate that hurricane conditions sustained winds of 74 mph or higher are expected somewhere within the specified area.

### National Hurricane Center

For the product examples such as the ones listed under this same tab, see out site. It is far too early to know where storms could form, or how many will form in this period, but we all should be prepared, especially going into the peak of hurricane season. A hurricane watch is issued 48 hours in advance of the anticipated onset of tropical-storm-force winds.

### National Hurricane Center

Evacuate immediately if so ordered.

### Hurricane News, Hurricane Updates Florida

Seas are in the 6-8 ft range over the south central Caribbean, 3-5 ft over the north central Caribbean, and 3-4 ft elsewhere. Information on NWS tropical cyclone watch, warning, advisory, and outlook products is detailed below. HURRICANE TERMS TO KNOW Tropical Storm WATCH: An announcement that tropical storm conditions sustained winds of 39 to 73 mph are possible within the specified coastal area within 48 hours.
