## Worldwatch Hypes

. She also emphasises that the technology and know-how for effective water husbandry does exist.

## 2021

In Germany, state-of-the-art paper manufacturing plants use 100 times less water to produce each kilogram of paper than older factories elsewhere. Those figures are more than sufficient to push these countries well above the 1,000 cubic meter threshold, whatever its significance may be. Engineering projects, ever larger as demands spiral upward, have created an illusion of plenty even in the midst of scarcity.

**The Last Oasis: Facing Water Scarcity by Sandra Postel Paperback Book Free Shipp 9781853831485**

Between 2009 and 2015, Postel served as Freshwater Fellow of the National Geographic Society, and she has appeared at numerous conferences, advocating for a more water-secure world. However, despite the basic argument which Postel wishes to advance, one immediately notes that her list contains a very high percentage of countries with extremely low populations: four of her countries have less than a half million population and two others have exactly a half-million. This copy is LIKE NEW; the text is clear, bright, and unmarked; binding is tight.

## Last Oasis: Facing Water Scarcity by Sandra Postel

In this book from the Worldwatch Institute, Sandra Postel explains that decades of profligacy and mismanagement of the world's water resources have produced signs of shortages and environmental destruction. Last Oasis makes clear that the technologies and know-how exist to increase the productivity of every liter of water. Publication Year: 1992 Item Width: 5.

## The Last Oasis: Facing Water Scarcity

She is a Pew Fellow in Conservation and the Environment and a former vice president for research at the Worldwatch Institute.
