Student Research Training Programs

UF SSTRP has a rolling admission process which means applications will continue to be reviewed until the program is filled. Overall, SSTRP offers the motivated student a unique and intensive learning environment designed to provide challenging and inspiring experiences and to stimulate interest in science-related careers.

Research Training and Career Development

In those situations, the process of questioning, thinking, and solving is what makes the biggest difference, and leads to a lasting imprint on our world. Research-Related Training for first-year trainees is designed to enhance their knowledge of the process, practice, and ethics of biomedical and behavioral research. Courses are taught by post-docs, PhD candidates, and medical school students who are currently conducting research on the topic presented during the course.

Summer Training and Research (STAR) Program

Jay also directs an honors undergraduate student team that is investigating similar mechanisms to potentially treat osteoarthritis and has mentored a number of masters and PhD students. DSRTP must be selected in Section 9 of the SIP application form to be considered for this program.

Research Training Grant Programs

Research forces us to become comfortable with what makes us uncomfortable.

Student Science Training Program

They have joined the growing cadre of physicians and scientists whose specialized knowledge and skills are in great demand as our population ages. Ranadive has mentored a high school student, three undergraduate students, one medical student and one MD-PhD student previously at the Mayo Clinic.

Research Training Grant Programs

Previous community-based project experience is preferred but not required. CITI Program courses are approved for CME credits through the Albert Einstein Montefiore Continuing Professional Development Center CPDC.
