Supportive Housing Network of New York

The Pearly Mussels Bivalva: Unionoidea of New York State. Today, native mussels are often rare where once abundant. Since the Eastern Pearlshell inhabits coldwater trout streams, eutrophication has been a significant cause of its decline worldwide.

Black Pearl After Kitchen Nightmares

The periostracum is dark brown to black, without rays. At least three strategies have been identified.

Changing Perspectives on Pearly Mussels, North America's Most Imperiled Animals

Pearly mussels are among the most long-lived animals in the world.

Zebra Mussels, New York State, 2001

The reasons for native population losses are many, and explanations for exotic species expansions are often oversimplified. Geological Society,
