## **Stuck on Whales and Dolphins**

In 2008, a public health recommendation was issued, urging the people of the Faroe Islands to reduce their whale meat consumption, or stop it altogether. Either that is a coincidence beyond all coincidences, genius writing or, or maybe He really is God and understands our hang ups. If you believe that your work has been submitted to the Animal People Forum without your permission, please contact info animalpeopleforum.

## **Swallowed by a whale**

Inside the Research Library is a room with a giant metal file cabinet; inside the file cabinet are tens of tiny drawers; one of the drawers is labeled Illness; inside the Illness drawer are card dividers reading Blindness, Spleen. A newborn blue whale is 23 feet 7m long and weighs up to three tons 5950lbs or 2700kg ,which is about the size of a full grown hippo! Whaling is a cruel and unnecessary activity that must be stopped.

## **What Differences Are There Between Whales and Fish?**

Also, myself not being a marine biologist, I fail to see why the whale wouldn't swallow at least a little water with its food, Would this water not turn to vapor, releasing breathable oxygen? Indigenous people also hunted whales because of their meat to fulfil their basic survival needs.

## **Cape Cod Man's Story of Being Swallowed By a Whale**

However, vessels have been killing up to nearly a thousand minke whales and 50 fin whales each year in the Antarctic before the International Court of Justice ruled that it was illegal. All were accounted for except for one, a young whaler by the name of James Bartley. People are fascinated with whales and are thrilled to see them.

## **Stuck on Whales and Dolphins**

But in larger species like whales, the risk of long-term negative effects after ingestion steeply increases. Both hippos and whales evolved from four-legged, even-toed, hoofed ungulate ancestors that lived on land about 50 million years ago.

So I don't think that's going to be enough for us to get through. Eventually, their tails became bigger and stronger for powerful swimming and their back legs shrunk. Build background with historical information about whaling and whale conservation.
