## inositol 1

MIPS purified from mck1 $\Delta$  cells exhibited WT levels of MIPS protein but decreased enzymatic activity , suggesting that MCK1 affects enzymatic activity, but not synthesis, of MIPS. In addition, this compound could also be produced by cyclic synthesis ; and the hydrolysis of phosphatidylinositol.

## The Structure and Mechanism of myo

Semi-synthetic analogues of naturally occurring lipopeptides are currently in clinical trials with the aim of treating systemic candidiasis and aspergillosis.
