They then entered the river La Plata, after having surmounted all the dangers incident to those southern latitudes.

### Alessandro Malaspina

The Malaspina Expedition 1789-94 was the greatest of the eighteenth-century expeditions sent by European powers to collect scientific data.

### Lot 15

This desire had to do with Spain's negotiations with Britain than over Nootka Sound and the Pacific Northwest.

### La Expedicion Malaspina, 1789

This was granted and he sailed in 1789 in two ships. El grueso de aquel trabajo habría de permanecer inédito hasta 1885, cuando el teniente de navío publicó su obra Viaje político-científico alrededor del mundo de las corbetas Descubierta y Atrevida al mando de los capitanes de navío D. The expedition was to produce hydrographic charts for the use of Spanish merchantmen and warships and to report on the political, economic and defensive state of Spain's overseas possessions.
