## A Guide to Yankee Permaculture Publications: 1983

I am happy to be able to say that I was able to live up to their expectations, after lots of discussions on why they should change their methods.

### Designing your garden for fire resilience

No more abandonned lands without any tending? We then allow two or three years to pass, doing absolutely nothing to this area. Most enjoy more elbow-room and fewer people. Now you bring it out as a broad ditch and runs it along on contour, gradually letting the ditch taper out to nothing.

### Permaculture In Humid Landscapes

So I'm generally in favor of human lifestyles that tolerate overlap with other species, and where humans are encouraged to meet their own needs in part by removing unwanted or surplus materials from wild areas.

### The Prime Goal of Permaculture (permaculture forum at permies)

If we want to conserve green, vibrant, vitality in the landscape as good stewards, we may need to take a more active role in resilient design. Eggs are good example, in our local grocery store we have Regular eggs, Organic eggs, Brown eggs and Pasture Raised eggs. Yep this has all been on my mind.

## A Guide to Yankee Permaculture Publications: 1983

While I would like to be more actively engaging out in the community and doing more hands on wild fire work in the area. This option is still under evaluation.

## **are there currently millions of permaculture millionaires? (the story of Gert) (paul wheaton's pseudo blog forum at permies)**

On a local scale, swales and other irrigation-supplementing or water-harvesting features could create little bands or rings of fire-resistant trees.

### **Wildfires and permaculture (Wildfire forum at permies)**

Redhawk The keyline method of water management, as developed by Yeomans, turns out to be best suited for areas where there are only Tertiary levels of runoff stream to stream to river to ocean. I agree that all permaculture ventures are valuable, however there is no doubt in my mind that improving the methods of commercial agriculture will have a larger impact on society.
