### Flying in the “Gap” Between Earth and Space: NASA’s Airborne Science Program

The results are detailed in a published Wednesday in the journal *Frontiers in Microbiology*. The helmet has a reflective shield that can be pulled down over the face to protect the astronaut from radiation exposure severe sunburns. Retrieved April 1, 2019 — via.

### Scientists Discover Impenetrable Barrier 11,500 km above Earth

The scientists originally thought the highly charged electrons would slowly drift downward into the upper atmosphere and gradually be wiped out by interactions with air molecules.

### The Edge of Space Just Crept 12 Miles Closer to Earth

I mean, there are people living 220 miles away from planet Earth. By studying this environment, engineers are able to design vehicles such as the space shuttle and International Space Station ISS which keep astronauts safe from the harsh elements of space for long periods of time.

### Scientists Discover Impenetrable Barrier 11,500 km above Earth

The family who owned the ranch from 1994 until 1996 reported that cattle on the ranch were found mutilated or they simply vanished into thin air. . This great shield is built of five layers, and each can stake a claim to the 'beginning of space' title.
