Differential Diagnosis by the Trees: Neurodevelopmental Presentations. May contain limited notes, underlining or highlighting that does affect the text. The Handbook provides - The six crucial steps in differential diagnosis that must be considered for each and every patient- 27 decision trees that teach you how to go from the most common presenting symptoms to a final diagnosis- 62 differential diagnosis tables, each of which provides a head-to-head comparison of a disorder with its differential diagnostic contenders- A unique symptom index for DSM-IV-TR that lists in a convenient form those disorders that you should consider when formulating a differential diagnosis given a particular symptom in the patient's presentation The information provided in the decision trees, the differential diagnosis tables, and the symptom index is rich with information, each format with its own strengths, depending on the needs of a particular clinical situation.
