## Details

Einige Blattlaus-Schlupfwespen aus Israel Hymenoptera: Braconidae, Aphidiinae.

## Labeninae (Hymenoptera: Ichneumonidae): a study in phylogenetic reconstruction and evolutionary biology

Abbot 1934 described in detail the mechanics of oviposition, and Cheeseman 191922 described the oviposition of *Rhyssa persuasoria* L. Occasionally, accidents can happen and the ichneumonid may miss the target host and the egg may stick on her own body, when the larva hatches it at once attacks its own parent.

## Description of the Final Instar Larva of *Perithous scurra* with Comments on Its Morphological Characters (Hymenoptera: Ichneumonidae, Pimplinae, Delomeristini) on JSTOR

This membrane, or sac, persists until the 2nd larval stage, and through it the larva derives its liquid food.

## Biology and Development of *Xanthopimpla pedator* (Hymenoptera: Ichneumonidae): Pupal Endoparasitoid of *Antheraea mylitta* (Lepidoptera: Saturniidae)

Fore wing with areolet almost always closed. Lanfranco in the Labenini from Chile. A new species of *Hygroplitis* Thomson in England Hymenoptera: Braconidae, Microgastrinae.

## Ichneumoninae

Biological notes on some parasitoids of *Zygaena Fabricius*, 1775 Lepidoptera: Zygaenidae and an overwintering host for *Monodontomerus*

vicellae Walker, 1847 in Britain Hymenoptera: Torymidae. Zootaxa 3881 3 : 237—257.
