Rethinking the National Parks for the 21st Century

The IUCN Council is the principal governing body of IUCN. Indirect measurements — such as multiplying the area under protection by a low range of possible human densities — yield estimates of 900,000 to 14.

Conservation policy and indigenous peoples

Training and development must be seen as continuing education that is fundamental to maintain a creative and effective workforce. Biodivers Conserv 15, 2765–2786 2006. Prior to each interview, researchers provided information about the project and then acquired oral consent from each participant UAF IRB 220265-3.

Ecology and Society: Parks, people, and change: the importance of multistakeholder engagement in adaptation planning for conserved areas

Delivering results on this scale, especially in complex landscapes with diverse government, private, and community actors, can only happen through collaboration. The Park Service should be viewed as such an institution. One of the most important elements to this has been a focus on tourism.

Resident peoples and National Parks: social dilemmas and strategies in international conservation

EXPERIENCE YOUR AMERICA National Park Service U. KWCA aimed to give these local conservancies a common voice, work for a unifying policy and legal framework at the national level, and enable the local organizations to learn from each other in their design and development.

Impacts of Community

In this study we analyse the deforestation process to address the question of whether existing strategies such as national protected areas PAs and indigenous reservations IRs are effective protecting forests in the Colombian Guyana shield. The Service also consults with other nations in

establishing and operating their parks and protected areas, many of which are patterned after America's National Park Service. Potential adaptations We asked participants to provide advice about how Denali should adapt to observed changes.

Conserving Wildlife in Africa: Integrated Conservation and Development Projects and Beyond

Wildland Recreation Policy: An Introduction.

CAB Direct

Everywhere, both within and beyond park boundaries, the Service should play a larger role in alerting the public to the conditions in our watersheds and along our coasts. Inadequate knowledge about the project environment. In the time since the Renaissance, the global human population has grown from a half billion to over seven billion.
