Herman Ruge Jervell, A New Proof of the Classical Herbrand and Skolem Theorem

We also show that the method is complete for LJ. In addition to the traditional, foundational branch of proof theory, today there is a good deal of interest in structural proof theory, a branch of the subject that focuses on logical deductive calculi and their properties.

These abstract combinatorial results apply then directly to cut-elimination thanks to expansion trees, yielding sharper measures and estimates than the traditional ones.

Herman Ruge Jervell, A New Proof of the Classical Herbrand and Skolem Theorem

Proof search in intuitionistic logic based on constraint satisfaction.

On Herbrand's Theorem for Intuitionistic Logic

Proof schemata are parameterized sequences of first-order proofs constructed using primitive recursive definitions.

. From the ICNF-schemata we can obtain so-called Herbrand systems, i.
