### Immediately loaded fixed maxillary implant treatment for a patient with advanced periodontal disease: A clinical report

Trismus, that is, limited mouth opening, is a common complaint after oral cancer surgery. Note that trismus could be exacerbated by the fibrotic changes due to combination radiotherapy.

### Oral Complications and Management Strategies for Patients Undergoing Cancer Therapy

Most patients with periodontitis benefit from regular SPT, typically every three months, although this recall is dependent on health status and risk factors.

### Management of Edentulous Patients

A diagnosis of advanced periodontal disease with a hopeless prognosis for the remaining dentition typically results in complete-mouth extractions and placement of immediate dentures.

### Advanced periodontal disease: surgical and prosthetic management.

CLINICAL REPORT Year : 2008 Volume : 8 Issue : 4 Page : 216-220 Prosthetic management of a case of advanced periodontitis with telescopic dentures , , Department of Prosthodontics, Goa Dental College and Hospital, Bambolim-403 202, Goa, India Date of Web Publication 7-Apr-2009 Correspondence Address: Vernie Ann Fernandes Department of Prosthodontics, Goa Dental College and Hospital, Bambolim-403 202, Goa India Source of Support: None, Conflict of Interest: None DOI: 10. The mandibular denture was processed using a flexible denture material Valplast because of the lingually inclined mandibular teeth. Regenerative Procedures Bone grafting is a surgical procedure that promotes the growth of bone in an area where bone has actually been destroyed by periodontal disease.

### Advanced Periodontal Disease: Symptoms and Treatment

The high turnover rate and low radiation resistance of the mucosal cells within the oral cavity, pharynx, and larynx make them susceptible to

destruction from head and neck fractionated external beam irradiation.

#### **Treatment of Advanced Periodontal Disease: Keys to Achieving Restoration Longevity**

Conventional dentures and a bar-retained implant-supported prosthesis were discussed. Clin Oral Implants Res 2003; 14: pp.
