

# Instrumentation for submillimeter spectroscopy - 5-6 December 1985, Cannes, France

**International Society for Optical Engineering - Architectures and algorithms for digital image processing; Proceedings of the Meeting, Cannes, France, December 5, 6, 1985 (Conference)**

Description: -

-  
Radio astronomy -- Congresses.  
Plasma (Ionized gases) -- Congresses.  
Submillimeter waves -- Congresses.  
Microwave spectroscopy -- Congresses. Instrumentation for submillimeter spectroscopy - 5-6 December 1985, Cannes, France

-  
Report - Institute on Human Values in Medicine -- [no. 15.] v. 598.  
Proceedings of SPIE--the International Society for Optical Engineering ; v. 598

Proceedings ;Instrumentation for submillimeter spectroscopy - 5-6 December 1985, Cannes, France

Notes: Includes bibliographies and index.  
This edition was published in 1986

## Phaselock system for millimeter

He reports on an extensive series of measurements of bandwidth, photoconductive gain, and direct detection responsivity for a series of highly compensated, NTD detectors grown specifically for this purpose.

## THIS: a tuneable heterodyne infrared spectrometer

In all these papers the Allan variance are very important tools for the development.

**Instrumentation for submillimeter spectroscopy; Proceedings of the Meeting, Cannes, France, December 5, 6, 1985 (Conference)**

This allows a variety of molecules, e.

**Instrumentation for submillimeter spectroscopy; Proceedings of the Meeting, Cannes, France, December 5, 6, 1985 (Conference)**

Winnewisser; Experimental Astronomy 1, 101 1989 The last paper demonstrates the importance of the method for the successful development of acousto-optical spectrometers AOS in general. The conference presents papers on architectures for hybrid and optical processing, image processing and analysis, and modelization-artificial vision-processing for robots.

**Architectures and algorithms for digital image processing; Proceedings of the Meeting, Cannes, France, December 5, 6, 1985 (Conference)**

Topics examined include superconducting mixers, Schottky-diode mixers, local oscillators, antennas and quasi-optical components, spectrometry, and systems aspects.
