## Agricultural strategies in the face of pandemics and climate change

However, this increased productivity does not translate into increased agricultural profitability, or increased agricultural wealth through increases in farmland values. When requesting a correction, please mention this item's handle: RePEc:zbw:iamost:93012.

## Agriculture Finance & Agriculture Insurance

Skill sets and technologies need to be improved to respond to this situation appropriately. It is also important to select more effective modes for public intervention regulation, assistance, financing, and partnership with the private sector and enhance direct public involvement in environmental preservation and improvement. And how should they co-ordinate with policy makers in other agencies or ministries, and with counterparts in other

countries? The GFFA is an international conference on central future issues of agri-food policy.
