

Investigation of stimulus energy relationships in metacontrast masking.

- - Metacontrast masking with texture

Description: -

- investigation of stimulus energy relationships in metacontrast masking.
- investigation of stimulus energy relationships in metacontrast masking.

Notes: Thesis (Ph.D.)--The Queen's University of Belfast, 1980.

Metacontrast masking as a function of mask energy

This finding dissolves the apparent contradiction of literature. For these tasks, participants were asked to identify the location of gap in one side of a square.

Frontiers

Intensity and contour effects in visual masking. Such incomplete pupil covering can nevertheless be determined from the eyetracking data by detection of an abrupt change in recorded pupil size.

Metacontrast masking as a function of mask energy

Research has shown that the auditory system differently weights the spatial cues over the stimulus duration; the sound source direction is determined mainly by the onset of the stimulus, where localization cues of the direct sound prevail. Japanese Psychological Research, 7, 138-147.

In follow-up analyses, RM-ANOVAs were used when indicated, and Holm-Bonferroni-corrected one-tailed t-tests were used.

Visual Masking in Schizophrenia: Overview and Theoretical Implications

These findings bear on theories of metacontrast masking by showing that the mechanism giving rise to nonmonotonic masking effects can operate beyond the level of first-order stimulus processing. Performance is near chance at SOA of 10 ms only in the retinotopic mask condition.

Overnight Defense: Biden announces end to US support for offensive operations in Yemen

In the target stimulus with masking stimulus conditions, duration of the target stimulus was constant at 16 ms, and duration of the masking stimulus was altered 16, 48 and 144 ms. This type of masking is called metacontrast for backward masking and paracontrast for forward masking.

Suppression on neuronal responses by a metacontrast masking stimulus in monkey V4

As the economy becomes more complex, companies tend to become larger and more hierarchical. Current Opinion in Neurobiology, 8, 529-535. Temporal order judgment and simple reaction times: Evidence for a common processing system.
