## Economics and Policy Issues in Climate Change

Harvard Project on International Climate Agreements.

## Economics and Policy Issues in Climate Change

Due to emissions trading, may become a less competitive fuel than other options. As the above-mentioned CSE also adds: Developing countries, on the other hand, have taken the road to growth and development very recently.

## Global Emissions Trading: Key Issues for Industrialized Countries

Many companies now engage in emissions abatement, offsetting, and sequestration programs to generate credits that can be sold on one of the exchanges. Forestry, which contributed net removals of 17.

## Emissions trading

Phase I permits participants to trade among themselves and in validated credits from the developing world through Kyoto's. Phase II saw some tightening, but the use of JI and CDM offsets was allowed, with the result that no reductions in the EU will be required to meet the Phase II cap. Although the Financial working group reached agreement, the three other groups—Mechanisms, Compliance, and Land Use-Land Use Change and Forestry—could not complete their work.
