likelihood of the existence of extraterrestrial civilizations

Known as the Drake equation, this formulation rounds up the variables that determine whether or not humans are likely to find or be found by intelligent extraterrestrials: The average rate of star formation per year in the galaxy, the fraction of those stars with planets, the fraction of those planets that form an ecosystem, and the even smaller fraction that develop life.

Extraterrestrial civilizations (1981 edition)

On 20 July 2015, British physicist and Russian billionaire , along with the , announced a well-funded effort, called the , to expand efforts to search for extraterrestrial life.

Project seeking UFOs and alien civilizations to be led by Harvard

One sign that a planet probably already contains life is the presence of an atmosphere with significant amounts of , since that gas is highly reactive and generally would not last long without constant replenishment.

Astronomers Say There Could Be 36 Communicating Extraterrestrial Civilizations in Milky Way

In it, they discussed the , in which they claim that Earth-like life is rare in the , whereas life is common. I believe that this novel holds the most reasonable conclusions about what extraterrestrial life may really be like, using scientific knowledge and an examination of our own history to support his theories.

Researchers will look for 'extraterrestrial technological civilizations' using AI

Other project research areas will include searching for small ETC satellites that may be observing , and analysis of UAP sightings.
