## Wassily Kandinsky — Color Study. Squares with Concentric Circles, 1913

Within each square unit, he paints concentric circles, meaning that the circles share a central point. If your family members choose to pursue testing, they can learn if they have inherited the same genetic mutation. Gender differences in color associations can also be seen amongst adults.

## The Four Color Personalities

. You may love the work, and you may instill your own meanings connected to it, but that doesn't make anyone else ignorant, or mean that their opinion is less valid. Even small factors — like clothing — can make a difference.

## The Four Color Personalities

Red can also trigger danger so you want to use the color sparingly. Personalized routing to care pathways Drive desired behavior with digital onboarding and routing to the right care pathways for each patient.

## Color Psychology: The Psychological Effects of Colors

A Rose by Any Other Name.

## Color Psychology: The Psychological Effects & Meanings of Colors

Some colors give us a sense of serenity and calm; these usually lie within the blue side of the spectrum—that consists of purple and green too, known as the cool side. Push the values to the extremes. Objects under a uniform light-source will promote better impression of three-dimensional shape.

## Color Psychology: How Color Meanings Affect You & Your Brand

Understanding the uses of color is crucial to effective composition in design and the fine arts.
