Providing the trauma is severe enough, most individuals will go on to develop PTSD. The resulting symptoms are states of sudden muteness, deafness.

Transgenerational Transmission of War

Salmon, chief consultant in psychiatry with the American Expeditionary Forces in France: immediacy, proximity, expectancy, simplicity, and centrality. It was noticed that soldiers treated in a frontline hospital, benefiting from the emotional support of their comrades, had a high likelihood of returning to their unit, whereas those who were evacuated often showed a poor prognosis, with chronic symptoms that ultimately led to discharge from the military. .

International Handbook of Traumatic Stress Syndromes (Apr 30, 1993 edition)

Following heavy bombardment of Israeli towns in the North, Israeli soldiers crossed the Lebanese border and fought against Palestine Liberation Organization PLO and Syrian troops.

Trauma Related to Torture, Detention, and Internment: Torture of a Norwegian Ship Crew; L.

From shell shock and war neurosis to posttraumatic stress disorder: a history of psychotraumatology

Such diagnoses were, for instance, war neurasthenia and war psychoneurosis, in France. The cases of war neurosis observed during WWI were indeed a challenge to psychoanalytical theories; it was simply unbelievable that all cases were caused by childhood traumas and it had to be

admitted that psychological symptoms could be produced by recent traumas.

International Handbook of Traumatic Stress Syndromes (Apr 30, 1993 edition)

In 1941, the first year of the war for the United States, Abram Kardiner - famous for having been analyzed by Freud himself - published a book based on his treatment of WWI veterans at Veterans Hospital No. .
