skin.

Cutaneous T Cell Lymphoma

Because lymph tissue is found all through the body, lymphoma can begin almost anywhere.

WHO

We also treat Burkitt lymphoma, cutaneous t-cell lymphoma CTCL and Waldenstrom's macroglobulinemia. Medicines may be put on the skin as a cream or gel. In stage 4, the cancer has spread to an internal organ.

Cutaneous T

MEITL is not linked to celiac disease. NHL can cause a variety of symptoms ranging from mild to severe, or the disease may be discovered incidentally during evaluation for another problem.

Key Statistics for Lymphoma of the Skin

In studies, it has cleared CTCL on the
