CHAPTER 3

Sampling strategy cannot be separated from measurement method. Use at the landscape scale involves the linkage of the ecosystem model to a geographical information system GIS. Regional Safety Manager or the Regional Safety Officer shall provide CDSPCs with an orientation to the USGS safety program within 90 days of their appointment to the position.

Methodology for assessment of the accessibility of a brown coal deposit with Analytical Hierarchy Process and Weighted Linear Combination

By examining existing landslides in an area, it is possible to recognize how permanent factors contributed to these slope failures. Collateral Duty Safety Program Coordinators.

An integrated risk and vulnerability assessment framework for climate change and malaria transmission in East Africa

Occupational Safety and Health Program Manager.

Assessing landslide exposure in areas with limited landslide information

Develops OSH program policies, directives, and alternate or supplemental standards and guidelines to meet employee, contractor, concessionaire, volunteer safety and health requirements. In some situations, the BLM may choose to develop this information concurrently with resource management planning, and the final rule does not preclude this option.

CHAPTER 10

The final rule adopts the proposal to remove the definition of guidance.

CHAPTER 10

Employee Training Requirements see Appendix 14-1. In addition to the personal protective equipment required in section 16. Collateral Duty Safety Program Coordinators.
