Bangladesh Fertility Rate 1950

The following table gives the relevant evidence from the 1989 BFS and 2007 BDHS in terms of median age at 1 st birth: Table: 3. Age at marriage has the greatest effect of all the variables on children ever born; given the association between age at marriage and education, it can be argued that education does indeed affect fertility.

Successful family planning in Bangladesh

Sarker AR, Sheikh N, Mahumud RA, Sultana M.

Child Marriage and Fertility in Bangladesh

Free contraceptives for women To reduce population growth, Bangladesh has been providing free contraceptives to women for decades. The average program effect 0.

Female education and fertility in Bangladesh
